NAME: _____ ROLL No. _____

ASSIGNMENT

1) **Reading for Understanding**

Red Panda

Very rare and difficult to capture, pandas belong to the bear family. The red or lesser panda is different in size and colour from the giant or greater panda.

The most striking feature of the red pandas is their agility. When in the jungles, these small creatures with their strength, agility and cunningness can free themselves from captivity.

The red panda's dense, woolly coat of reddish-brown fur has lighter coloured bands on the tail. The face is white with a reddish-brown strip on each cheek.

The red panda is a magnificent climber and moves from tree to tree in the twinkling of an eye.

Pandas are omnivorous and live on a variety of succulent fruits, roots, tender bamboo leaves, insects, and occasionally raid beehives for honey and nests of birds for eggs. They rear their young ones in the hollows of hardwood trees.

A) **Answer the following questions.**

1. To which family do pandas belong?

Answer: _____

2. How is the red panda different from the giant panda?

Answer: _____

3. What is the most striking feature of the red panda?

Answer:_____

4. Describe the appearance of the red panda.

Answer:_____

5. What do pandas eat?

Answer:_____
