NAME :

ROLL NO. :

CHEMISTRY

Assignment:

Q1. Observe the objects around you and answer:

Object	Is it Solid, Liquid, or Gas?	Can it change shape?	Can it be compressed?
Air in a balloon			
Ice cube			
Cooking oil			
Steam			
Book			

Q2. Case-Based Question:

Reena boiled water in a kettle. After a few minutes, she noticed steam coming out and some water spilled.

(a).What changes of state are happening here?

(b). Which form of matter is escaping from the kettle?

(c). Why did the kettle spill?

Q3. Competency: Problem-Solving & Critical Thinking.

Situation: Your younger sibling says, "Salt disappears in water, so it is not matter."

How will you explain to them that salt is still matter?

Answer:

Part B: Hands-On Activity (Competency: Observation, Experimentation)

Title: Test Solubility of Different Substances

Materials Needed:

- 4 glasses of water
- Sugar, salt, sand, oil

Steps:

1. Add a spoon of each substance into separate glasses.
2. Stir well.
3. Observe what dissolves and what doesn't.

Record Your Findings in a Table:

Substance	Does it dissolve in water? (Yes/No)	State of Matter
Sugar		
Salt		
Sand		
Oil		

Q. Conclusion: What kind of substances dissolve easily in water?

Ans:

Part C: Creative Project:

Make a model or poster on “The States of Matter and Their Properties”.

Instructions:

- Use paper, cardboard, or clay.
- Clearly label particles in solids, liquids, and gases.
- Mention 2 key properties of each state.
- Optional: Create a flipbook or story titled “The Adventures of Water Molecule” showing its journey through solid, liquid, and gas states.

Note: Neatness, creativity, and scientific accuracy will be appreciated.
